Career Goal: Secure an AI/ML Engineer role at a top product-based company while building impactful AI solutions.

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur 2024 – 2028
B.Tech, Computer Science (Artificial Intelligence & Machine Learning) — SGPA 8.48 (Semester 5)

EXPERIENCE

Machine Learning Intern — FlyRank Aug 2026 – Present

- Ran ML workflows end-to-end: data preprocessing, feature engineering, exploratory data analysis, and predictive modeling using Python, Pandas, Scikit-learn, and DuckDB.
- Built and evaluated ML models on large-scale datasets; documented experiments following reproducible ML workflow best practices.

AI Intern — Edunet Foundation May 2026 – Jul 2026

- Developed AI and machine learning solutions through project-based learning, including data preprocessing, model development, and AI application deployment.
- Collaborated with mentors to build practical solutions using Python and machine learning libraries.

Student Intern — 1M1B (One Million for One Billion) Jun 2026 – Aug 2026

- Contributed to sustainability-focused projects using AI and data analytics; researched environmental challenges.
- Developed AI-powered solutions and prepared presentations/reports to improve awareness and decision-making around sustainable development.

PROJECTS

Smart Campus Sustainability Dashboard

Python · Streamlit · Scikit-learn · Prophet

- Built a live sustainability dashboard for PSIT Kanpur tracking energy consumption, water usage, solar power generation, and CO₂ savings across departments.
- Implemented Isolation Forest for anomaly detection, Facebook Prophet for forecasting, and a Decision Tree model for Green Score prediction, with auto-refreshing interactive visualizations.

ExamLens AI

Python · Streamlit · Groq API · Llama 3.3

- Built an AI-powered exam paper analyzer that identifies frequently asked topics from previous years' papers and predicts likely questions.
- Generates topic-wise study roadmaps and practice MCQs, highlights key formulas, and exports revision-ready PDF reports.

DataAnalystEnv

FastAPI · Docker · Hugging Face

- Built for the OpenEnv Hackathon.

Recommendation System

Python · Machine Learning

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript

ML / DL: Machine Learning, Deep Learning, NLP, Scikit-learn, TensorFlow, PyTorch

Tools & Platforms: Pandas, NumPy, FastAPI, Google Cloud, Docker, Git, GitHub, Power BI, BigQuery, MySQL/SQLite

CERTIFICATIONS

- IBM Artificial Intelligence Fundamentals
- IBM Data Fundamentals
- Python for Data Science
- Machine Learning (DeepLearning.AI)
- Deloitte Data Analytics Job Simulation
